

# Experiment 06 - Exercise 05: Cone Volume (Lambda)

Tofik Ali

February 14, 2026

## Objective

Compute volume of a cone using a lambda function.

## Input

Radius  $r$  and height  $h$ .

## Output

Volume value.

## Approach

Use formula  $V = \frac{1}{3}\pi r^2 h$  inside a lambda.

## Time Complexity

$\Theta(1)$ .
