

# Experiment 01 - Exercise 02: String Variable x

Tofik Ali

February 14, 2026

## Objective

Declare a string variable `x` and assign the value "Hello". Print the value of `x`.

## Input

No input.

## Output

Print `x`.

## Approach

Assign `x = "Hello"` and print it using `print(x)`.

## Time Complexity

$O(1)$ .
