Experiment 02 - Exercise 04: Greatest Among Three Numbers

Tofik Ali

February 14, 2026

Objective

Find the greatest among three numbers (assume no two values are the same).

Input

Three numbers `a`, `b`, `c`.

Output

The greatest number.

Approach

Track a variable `greatest` and update it after comparisons, or use nested `if` statements.

Time Complexity

`O(1)`.
