Experiment 01 - Exercise 04: Basic Arithmetic on Integers

Tofik Ali

February 14, 2026

Objective

Declare integer variables (e.g., x=9, y=7) and perform addition, subtraction, multiplication, and division.

Input

No input (use fixed values as given).

Output

Results of x+y, x-y, x*y, x/y.

Approach

Compute each operation and print the results clearly.

Time Complexity

O(1).
