Experiment 04 - Exercise 03: Print Words on Separate Lines

Tofik Ali

February 14, 2026

Objective

Input a sentence and print each word in a separate line.

Input

A sentence (string).

Output

One word per line.

Approach

Use `split()` to get the list of words, then print each word using a loop.

Time Complexity

`O(n)` where n is the number of characters (or words).
