

Experiment 01 - Exercise 05: Hypotenuse (Pythagoras Theorem)

Tofik Ali

February 20, 2026

Objective

Compute the hypotenuse length c of a right triangle using:

$$c = \sqrt{a^2 + b^2}$$

Input

Two non-negative real numbers a and b .

Output

The computed hypotenuse c .

Approach

Read a and b , then compute c using `sqrt(a*a + b*b)`.

Time Complexity

$O(1)$.
