

Experiment 02 - Exercise 03: Greatest Among Two Numbers

Tofik Ali

February 20, 2026

Objective

Find the greatest among two numbers. If numbers are equal, print a suitable message.

Input

Two numbers `a` and `b`.

Output

Greatest number or "Numbers are equal".

Approach

Compare using `if/elif/else`:

- if `a > b` then `a` is greatest
- else if `b > a` then `b` is greatest
- else they are equal

Time Complexity

$O(1)$.
